This Stove is a first-class economizer in fuel-it differs materially from others in this respect. The columns are larger. By means of a damper, the hest is pussed down the two front columns, under the bottom, back up the two rear columns and out of the p.pc. which sets on the top of the stove. By this arrangement you have the finest radiator and economizer extant. All will admit that it is desired that a heating stove should be searranged that a majority of the heat be thrown so arranged that a majority of the heat be thrown out in front, instead of back. Call and see this BEAUTIFUL STOVE, at And the NINETY other styles and sizes. If you went to see what is Manufactured in Tillin call in. Remember the motto-SUPPORT HOME BACK AGAIN AT THE
